

A woman with long dark hair, wearing a white lace top and tan pants, stands in a modern living room. She is smiling and giving a thumbs up with her right hand and a stop sign gesture with her left hand. The room features light wood flooring, a beige sofa with colorful pillows, and several framed artworks on the wall. A large window with white curtains is visible in the background.

**MULTIVO wood performance floor**

# The floor that can do more

*World's First*

6 times the performance – unique comfort for your home

**Naturally beautiful flooring**

# HARO MULTIVO

The revolution  
for a cosier home

# MULTIVO: The best of parquet and design floors

The innovative MULTIVO combines the naturalness of a parquet floor with the multifaceted benefits of a healthy living design floor.

MULTIVO consists of 6 layers. Each layer performs a specific job, each of which goes into creating the exceptional quality of this floor. The floor appeals to each of your senses and meets every need that a modern floor should meet.

# MULTIVO: Performance and comfort for a cosier home

Every individual layer of MULTIVO makes its very own contribution to the floor's quality.

Beautiful

## The natural floor made of wood:

- Carefully selected and sorted materials ensure that your floor will always radiate the beautiful and harmonious look of wood.
- The floor is produced in a sustainable, resource-conserving process. The top layer may indeed be just 0.6 mm thick, but the quality of the floor suffers in no way as a result
- Of course, the top layer is made of wood harvested from sustainably managed forests. You can enjoy your wood floor to the fullest without feeling a bit of guilt about your decision.

Highly durable

## The robust surface protection layer naturaDur plus:

- Naturally matt for a modern look.
- The layer is particularly tough, a quality that will keep your floor looking like it were just 1 day old.
- It is also highly abrasion-resistant. You can walk on the floor at home in your street shoes without thinking twice about it.

Healthy living

## The elastic pressure distribution layer ElastoTec:

- It creates an exceptionally high level of walking comfort and makes you feel as though you were walking on a forest floor itself.
- The floor also has exceptional acoustical levels, the result of a reduction in footfall sound.

Robust

## The stable rigid coreboard:

- One key aspect of this quality is the floor's resistance to moisture. This means that the floor will not immediately begin to swell if water is spilled on it by accident.
- As a result, the floor is stable by nature and is easy to install.
- The floor is made of regenerative raw materials. As such, the floor's core-board harmonises with the sustainable top layer.

Water repellent

## The smart HydroResist barrier:

- It acts as a moisture barrier protecting the floor from moisture that may well up from below if the subfloor contains any residual moisture.
- It also has a stabilising effect.

Quiet

## The integrated cork insulation underlay:

- Has an insulating effect and will reduce your heating bill if you do not use an underfloor heating system.
- Additional noise insulation helps to create the floor's good acoustical levels.
- Cork is a regenerative raw material and helps to make the floor sustainable.

Plank format  
9.9 x 235 x 2200 mm

# MULTIVO: Quality for every room

Our MULTIVO wood performance floor will turn your home into a cosy and stylish hideaway.

MULTIVO will help you to save energy:

1. Warm underfoot even without underfloor heating thanks to the floor's special layer design.
2. Faster warming of rooms with underfloor heating thanks to low thermal conductivity of  $0.067\text{m}^2\text{K/W}$ .

# Floors are our passion

HARO quality since 1866

To ensure that your HARO floor will provide you with many years of pleasure, we process and refine only high-quality natural materials. Our floors have proven themselves millions of times over and are used around the world. But they are made not just anywhere. We produce them right here in Rosenheim. This turns every HARO quality floor into a high-yield investment that will pay off handsomely over the years.

We have been working with wood for more than 150 years. As Germany's leading floor manufacturer, we passionately and precisely produce naturally beautiful floors. The family-run company is now in its 5th generation. As such a company, we assume our entrepreneurial responsibility and work on behalf of society, the environment and people – with respect and esteem.
